

**KSIS Beginning-of-Year Training
July 22-23, 2015**

Validating course setup using the Teacher Course Check report

Questions and Answers

Lisa Keeter & Shale Detwiler, Office of Knowledge,
Information and Data Services,
Enterprise Data Division

- 1. Question: If a district is not using the PGES portion of CIITS, is the Student Growth Percentile information still relevant?**

Answer: Yes, growth will still be calculated based on data in Infinite Campus. Teachers just won't see the calculation in EDS if not using that system.

- 2. Question: I know that some parts of CIITS (like the Student Voice Survey) will no longer be available to those districts and we'll have to collect our own information in that regard. Just trying to get straight in my mind if the Student Growth Percentile is like that or if it's available regardless of whether or not we're using PGES?**

Answer: SGP is calculated by the Office of Assessment and Accountability and loaded to Campus. Data is in Infinite Campus and will be able to be accessed there and used in any system a district opts to utilize. It is still relevant regardless of EDS decision – it's a PGES requirement.
